

## Q0 // Distinguished or nah?

Anish is trying to figure out if he will be able to get on the distinguished honour roll with his marks (he's failing everything don't tell him). To figure out if he gets on the distinguished honour roll, he needs to make a program that calculates his average.

### Input Specification:

The first 13 lines will contain the integer  $N$  ( $0 \leq N \leq 100$ ), the mark Anish got.

### Output Specification:

Output the average that Anish got satisfying the constraints above. If there are decimal places, round it down (Anish is NOT petty).

### Sample Input:

```
70
65
98
50
19
43
45
79
30
20
87
88
86
```

### Sample Output:

```
60
```
