Q2 // Anish's Transfer

Anish managed to go to guidance and get his schedule changed from Mathematics grade 9 academic to enriched. Since he missed a *whole week* of class, he needs to do a whole week of math homework in order to catch up. Mr. Ing taught number patterns the whole week, and all of his homework is really repetitive. Anish decided that he had enough of doing the work by hand and decided to make a program that makes the patterns for him.

Input Specification:
The first 3 lines will contain the integers s ($0<=s<=100$), p ($1<=p<=100$), e ($s<e<=5000$), respectively.

Output Specification:
Output the number pattern with commas separating each of them on one line.

Sample Input:

```
1
2
11
```

Sample Output:

```
1,3,5,7,9,11
```
